

# Wireless Charger

## What's included in the box

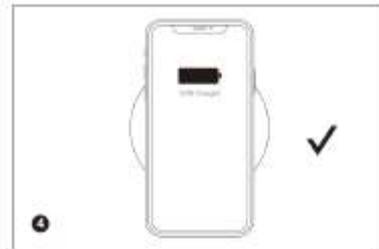

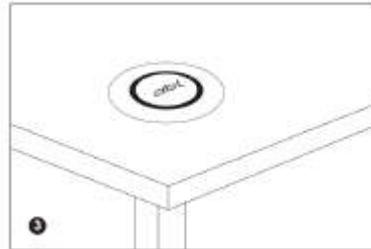

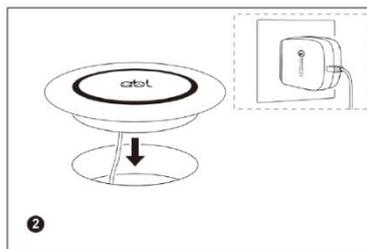

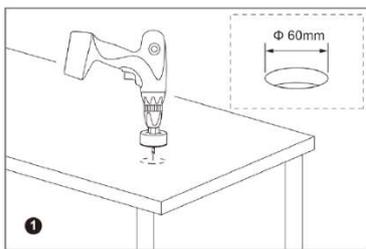

ABL's wireless charger has been designed to charge the latest Qi enabled devices by simply placing the device on the module. ABL's wireless charger can be installed in office desks and conference rooms.

### Universal Compatibility

The wireless charger is compatible with all Qi enabled phones and devices  
Apple I-phone 8, 8+ 10XS, 10Max/XR/X and I-phone 11 (full range)  
Samsung Galaxy S9, S9+, S10, S10+, S10E  
Samsung Note 8, s8, s8+, Edge S6, S6 plus  
Nexus 4 and 5  
Lumia 920

### CAUTION

- Do not apply external force on the cord
- Do not unplug the charger by pulling the cord
- Do not connect a binding cord to the power supply
- Do not dismantle product
- Do not use cable if it is damaged
- Only use product on an office desk or conference table
- Only use a dry cloth to clean charger

1

ABL's wireless charger has been designed to fit into a standard 60mm port hole in the desk. An 80mm holder is also provided if needed to ensure the wireless charger sits flush in the desk.

2

Simply plug the power connection into the device and place into the grommet hole. If the hole is 80mm add the accessory and place into the grommet hole, then plug into mains power.

**Please do NOT clip the accessory onto the charger if your desk hole is 60mm.**

3

Your wireless charger is now ready to use. Please note that ABL's wireless charger will only charge Qi enabled devices.

4

Simply place your Qi enabled devices on top of the wireless charger.

If your Qi device isn't charging, you may need to remove your cover or reposition it.
