

# OFFICE HAND SANITISERS

## Prevent the spread of germs

If there is one thing we learnt from the COVID-19 outbreak is that hand hygiene is a crucial tool for fighting against contagious infections. Unwashed hands are a very dangerous means for transferring unwanted, harmful germs. However, the most powerful weapon against them, soap and water, are not always of hand.

This is why we offer you the next best thing that has become a must in all busy, working areas. Hand sanitisers are the key to having clean doorknobs, handrails, touchscreens, tables, buttons, shopping trolleys, baskets, self-served machines and thus, protecting people.

## Automatic hand sanitiser dispenser station (floor standing)

### Key Features:

- Far less risk of cross contamination due to unit being automatic dispense unlike a pump or push version
