

WORKSTATIONS AND ACCESSORIES

## Sit-Stand Workstation

The Sit-Stand Workstation allows the end user to easily switch between sitting and standing at their desk. Changing your working position often keeps your body active, whilst reducing any risks associated with a sedentary lifestyle.

The Sit-Stand Workstation features a main shelf for a monitor, and a removable second shelf for a keyboard and mouse. The Sit-Stand Workstation uses a gas-assisted lift mechanism, this makes it easy to reposition without the use of any screws or levers.

Available colour:
